## Reliability

The cleaning business is too often known for high turnover and service that becomes increasingly less reliable as time passes. For over 20 years All Bright Services Inc. has led the janitorial industry in customer satisfaction. Our competitors frequently don't maintain the level of professionalism, personal attention and a positive attitude that they initially displayed when they sign the contract—All Bright does.

## Responsibility

By using All Bright Cleaning Services, you can be assured that your special requirements will be handled with the utmost of care and responsibility. We have extensive experience in following special standards. For example, we collaborate with medical manufacturers who must comply with strict requirements in cleanliness and sterility of their facilities. We help maintain their high standards and can do the same for you.

## Consistency

By consistently doing great work, we are earning an increasingly greater share of each of our clients' service opportunities. Our supervisors constantly track the progress and quality of each location when performing regular inspections "Spot Checks". All Bright can confidently guarantee results while eliminating the stresses associated with building maintenance and providing you with time for more important things.

## Quality

All Bright Services Inc. has a deep commitment to quality and specializes in making it show through in your business by presenting a clean environment for employees, visitors, and customers.

## Trust

We personally can assure a trustworthy and competent staff as each employee of All Bright Services Inc. has a minimum of two years experience in this field and has undergone a drug test/pre-screen background check. We recruit, train and hire a diverse group of motivated and dedicated professionals.
